Internship Program Admissions

This internship is accredited by the American Psychological Association and adheres to the Scholar-Practitioner model of training. We have three (3) funded internship positions. It is the goal of the program to help interns to become competent and knowledgeable psychologists working with a severely mentally ill adult inpatient population. The facility provides treatment using a multidisciplinary psychiatric rehabilitation model. The clinical training provides each intern with a unique opportunity to gain practical experience in assessment and intervention with a diverse patient population. In addition to the more generalist training experiences, interns will participate in each of the three following rotations: (1) Forensic (2) Psychological Assessment and (3) Specialized Behavior Plan. All interns will co-lead Dialectical Behavior Therapy (DBT), psychoeducational, and forensic groups. They will also design and implement behavior plans, conduct individual therapy, and complete forensic, intellectual and personality assessments. They will have an opportunity to provide supervision, and will participate in diversity and assessment seminars, and supervision of supervision group. Interns will also participate in multidisciplinary treatment team meetings.

The following requirements must be met in order to be considered for our program:

- U.S. citizenship
- Doctoral student in clinical or counseling psychology from an APA-accredited program.
- Completion of the APPIC application and one sample of an integrated report from a practicum site
- Certification of internship readiness by graduate program training director
- Completion of graduate program's comprehensive/qualifying examinations by ranking submission date
- Any offer of employment, including psychology internship, is contingent upon, but not limited to, the successful completion of the following: Level 2, Florida Department of Children and Families Background Investigation; Drug testing and pre-employment physical including Tuberculosis screening; Proof of measles, mumps and rubella (MMR) vaccination if born after 1957; Mandatory 5 day facility Orientation which includes certification in "MANDT," our verbal de-escalation training process and Certified Pulmonary Resuscitation.

Selected applicants are invited to interview during the month of January. The interview lasts approximately 2-3 hours. The applicants first meet with the current post-doctoral resident as a group to have a general orientation about the program and the site. Then, each applicant meets individually with various staff psychologists. Finally, the group of applicants meets with a current psychology intern for a Q&A session and a tour of the facility.

Does the program require that applicants have received a minimum number of hours of the following at time of application:

Total Direct Contact Intervention Hours	Yes	400
Total Direct Contact Assessment Hours	Yes	75
Describe any other required minimum criteria used to screen applicants:	Minimum of 600 hours of Supervision and Support Activities combined	

Financial and Other Benefit Support for Upcoming Training Year
