

# Partner Webinar on the Coronavirus

May 7, 2020

# Agenda

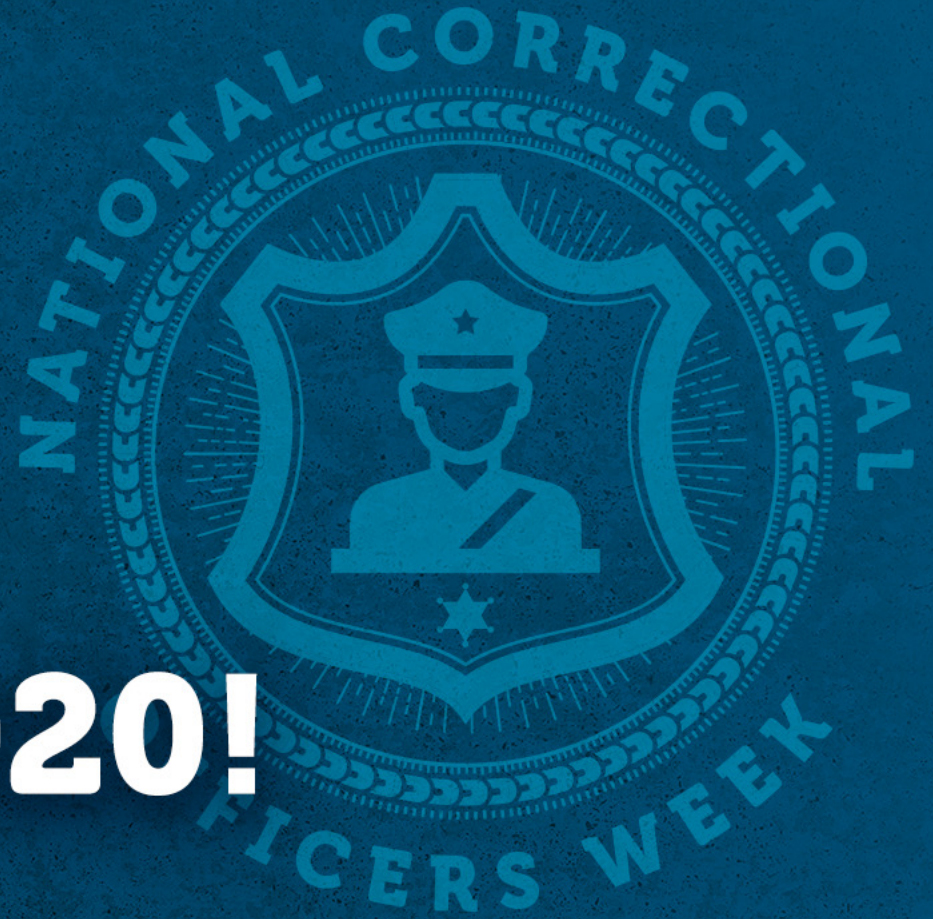

---

- **Executive Update**
- **Clinical Update**
- **Guest Speaker from MADOC**
  - **Commissioner Carol Mici**
- **Q/A**
- **Instant Poll**

# Happy National Correctional Officers Week 2020!

Thank you for your partnership and service!

# Clinical

Dr. Tom Pangburn // Chief Clinical Officer  
Kip Hallman // President

# CDC May 6 Report

Center for Disease Control and Prevention  
**MMWR** Morbidity and Mortality Weekly Report  
Early Release / Vol. 69 May 6, 2020

COVID-19 in Correctional and Detention Facilities —  
United States, February–April 2020

## Study Details

37 of 54 state or territorial health departments reported epidemiology data from 1/21 to 4/21 2020.

## Data reported:

- 32 departments reported 420 facilities with at least one case.
- 4,893 incarcerated persons and 2,778 staff members with lab-confirmed COVID-19.
- 491 hospitalizations (10%) and 88 deaths (2%) among inmates.
- 79 hospitalizations (3%) and 15 deaths (1%) among staff.

# Findings & Recommendations

---

- Half of facilities with COVID-19 cases reported them among staff members but not among incarcerated persons.
- Implication may be that staff, who move between facilities and community may be an important vector for the virus.
- Regular screening may reduce introduction from symptomatic persons.
- High rates of asymptomatic infection limits the effectiveness of screening alone.
- Physical distancing, movement restrictions, use of masks, intensified cleaning, staff training on infection control, and disinfection of high-touch surfaces in shared spaces are recommended.
- Testing may become important strategy when more widely available.

Dr. Tom Pangburn // Chief Clinical Officer

# Looking Ahead

---

## Considerations as states and communities open up

# Tracking and Trending

## COVID patient and staff cases

# COVID-19 Pop Up Testing Sites for First Responders

- **Live date April 5, 2020**
- Partnership between Executive Office of Public Security and Safety, MADOC, Wellpath, Brewster Ambulance, Quest Diagnostics, Massachusetts Air National Guard, Department of Fire Services, local Fire and Police Departments to create Pop up testing sites at:
  - Gillette- Foxboro
  - Big E- Springfield
- COVID-19 testing for approximately 400+ individuals per day seven days a week; testing:
  - Public Safety First Responders
    - DOC, DFS, EMS Municipal, EMS Private, Fire, Police, MEMA, State, MANG, PSAP, MSP
  - Grocery Store Workers
  - Wellpath employees
  - MBTA
  - Mortuary
  - Municipal
  - Other

**May 4, 2020 the Gillette site reached testing over 4,600 individuals within the community just under 2 weeks of operation.**

# COVID-19 Pop Up Testing Sites

- **Process includes:**
  - Patients calling the call center to create an appointment for testing
  - Preparing 400+ testing kits daily
  - Processing individuals through Quantum (Quest application)
  - Continuous collaboration with all teams to run a smooth operation daily
  - Patients drive through testing sites stopping at 3 stations to verify patient appointment, verify patient information and entering the hot zone for testing.
  - Daily follow up on all positive test results

Commissioner Carol Mici // MADOC

# Mobile Testing Unit

- **Live date April 22, 2020**
  - MCI-Framingham, SMCC, MCI Shirley, MA Treatment Center, OCCC medium and minimum and Bridgewater State Hospital
- Partnership between MADOC, Wellpath, Brewster Ambulance, Quest Diagnostics and the Department of Fire Services
- **Testing all employees and patients within MADOC facilities**
  - Goal is to test 100% of all individuals within the facility to identify individuals who may present asymptomatic; preventing the risk of COVID exposure.
  - Decreasing COVID-19 positive cases throughout the state's facilities
- **Process includes:**
  - Testing patients from unit to unit
  - Setting up a testing unit for all employees
  - Prepping testing kits and data entry
  - Entering Wellpath CCEs for all patients and Wellpath employees

### NEW ADDITIONS

#### Partner Webinar Presentation Notes and Q&A – Friday, March 27, 2020

April 1, 2020

Thank you for joining Wellpath on the COVID-19/Coronavirus Partner Webinar on Friday, March 27, 2020. Click here to access the presentation slides. Click here to access the Q&A.

#### Keeping it Clean

March 30, 2020

Avoid infection with cleaning, disinfection, and hygiene One of the best ways to avoid infection with COVID-19 is keeping a safe distance – at least six feet – from an infected person. That may be difficult in most correctional or detention facilities. While the likelihood of contracting COVID-19 from hard surfaces or paper products is lower than airborne, the Centers...
